Menno Engels

Software Engineer

Hi, I'm Menno Engels, a Software Engineer who is passionate about creating practical solutions to real world problems. My expertise includes developing complex systems and software applications using a range of programming languages and technologies. I have experience working with both front-end and back-end technologies and have a deep understanding of software development best practices, including agile methodologies, code review, and testing. In addition, I am dedicated to staying up to date with the latest technological advancements and continuously seek to improve my skills and knowledge.

I am currently focusing on building interesting and practical projects to further develop my Python skills.

EXPERIENCE

In-terest   FEBRUARI 2021 - JUNE 2022
IOS Developer

- As part of the development team for an indoor positioning system, I played a key role in rewriting code for an IOS App to improve its performance
- Developed code for an outdated content management system and integrating it with the mobile app.
- Guiding new interns in learning Swift and continuing the development of an IOS application

HCAS Hockey Club.   SEPTEMBER 2019 - FEBRUARI 2020
Full-Stack Developer

- Developed an online platform to manage hockey players and enhance their performance.
- Build a training environment that enables coaches to design and implement personalized training programs.
- In collaboration with SmartGoals B.V., hockey players were enabled to rewatch their matches and training sessions online.
